

## HESPERIAN COLLEGE.

This young and flourishing institution is located at WOODLAND, the county seat of Yolo county, California. It is situated in the heart of one of the most fertile, beautiful and healthy districts of the Pacific Coast. Its social, moral and religious surroundings are of the highest type. It admits both males and females.

The academic year is divided into two terms, each lasting twelve weeks. The first term begins August 22nd and ends December 22nd. The second term begins January 2nd and ends May 12th.

Baccalaureate Service, Sunday, May 12th, 1871.

# The Yolo Democrat.

California! Land of Liberty!

To Liberty's untarnished light,  
When first California's region shone,  
She bled from her starry light,  
And smiling glowed as her own.  
"Soil of my choice," she cried, "be free!"  
"Soil of my choice," she cried, "be free!"  
She spoke, and straight did earth and sea  
Swirl the land's children to the sea.  
All hail forever glad and free,  
California, land of liberty!

California's genius heard the strain,  
And proudly raised her glowing crest,  
His sons impatient filled the plain,  
Then poured their golden blood on breast.  
Rage money they impatient spared,  
They waved their golden blood on breast.  
And where the goddess' altar high in air,  
The nation's breath their silent prayer:  
To live in our land still and free,  
California, land of liberty!

War blew her clarion loud and long,  
Faintly led their legions on,  
To battle rushed the glorious throng,  
And soon the glorious cause was won.  
Such struggling freedom's end on death,  
Fighting he saw his country's foes,  
To Democracy the peaceful rose  
Content I'll die to keep this free,  
California, land of liberty!

And shall we ever dim those fires  
That flame from freedom's kindred shrine?  
While men's children shine their eyes  
On our land's glory from the pine?  
No! by the blood our fathers shed,  
On freedom's altar, we will stand,  
When streaming from the martyr's dead,  
We swear to keep this land free,  
California, land of liberty!

**Miscellaneous Items.**

In the year 1842, 12,000,000 people perished by famine in China.

There are eight hundred and fifty-four prisoners in the California Penitentiary.

The students of the State University number, at present, ninety-three, ten of whom are young ladies.

The Directors of the Yolo Valley Railroad have determined on lengthening their road to Pleasant Valley.

The famous Fanny Ellsler, who turned the heads of the grandfathers of the present generation, is still alive and well.

There are over two thousand women employed as postmasters in the United States, and it is said they give good satisfaction.

The California and Oregon Stage Company intend putting passengers and mail through from Portland to San Francisco in three and one-half days, during the coming summer.

The Northern Pacific Railroad has secured a land grant of 50,000 acres, and has put its lands upon the market. It will probably be in operation through its entire length within six years.

Of the new Congress which met on Saturday last 112 are members of the present House, and 114 are new members. Five of the members are negroes, one being a member of the present body.

One of the big trees standing in Calaveras county is 3,300 years old, and was as large as that now on exhibition in the time of Charlemagne. The big tree proper was as large in the days of Solomon.

A piece of bark was found in sinking a well at Los Angeles, at a depth of 165 feet. It was imbedded in a blue clay strata, containing also, oyster shells and pieces of what is supposed to be a pecular.

A PECULIAR feature in each of the ninety-three new locomotives built for the Great Western, of Canada, is the placing of the bell in front of the engine, with gearing to the driving-wheel, so that every revolution rings it.

ONE may insert a thousand excellent things in a newspaper and never hear a word of them from its readers. But let a line or two not suited to their taste creep in by accident, or otherwise, and one hears of it from every quarter.

ANOTHER petrifaction found similar to that at Calistoga has been discovered by Chas. Alexander, in Alexander Valley, Mendocino county. The trunks of trees and limbs are found in abundance beneath and above the surface of the ground.

THE planters of Louisiana and Mississippi are reported to be actively making arrangements to secure white labor for the next crop, and the supply fails to meet the demand. The demand for white servant girls in these States is very great, and good ones, it is said are paid from \$20 to \$25 a month.

THE Chief Engineer of the Tehuantepec ship canal survey informs the President that the work has been inaugurated, and that he has found water enough on the summit of the route for canal purposes. Similar information has been transmitted to the Central Government of Mexico.

THE bullion product west of the Rocky Mountains exceeds \$60,000,000 a year. In 1870 it was set down at \$37,000, and in 1880 it was about \$63,000,000. With improved processes for the reduction of ores, and the new impetus which has been given to mining, the bullion product for this region may run up to \$75,000,000.

A WONDERFUL invention of wett thread knitted in now in exhibition in Manchester. It is said to produce the best woolen cloth extant at the enormous rate of nearly a yard a minute. Practical manufacturers pronounce it a success and believe that it is destined to revolutionize the entire system of weaving woolen goods.

A CHILD about two years and a-half old, a son of David Harrison, of Big Canyon, near Lathrop, swallowed a large fish-bone, which lodged near the bottom of the wind-pipe. An incision was made in the wind-pipe and the bone extracted, but the child immediately expired, the continued choking for four days having exhausted him.

WHAT did the old Egyptian know about the oldest of the arts, about farming? He knew how to manage his great river—the one source of moisture and fertility in that climate—so as to turn the desert beyond its banks into a garden, and make Egypt a storehouse and granary for the surrounding nations. He built reservoirs so huge as to retain sufficient water from the overflowing river to feed it when it subsided—a lake four hundred and fifty miles around and three hundred feet deep—and this fitted up with a skillful system of floodgates, dams, and locks. These were water works on a stupendous scale, truly.

THE REASON WHY.—The Call inquires why Kate Smith was pardoned. The case is a peculiar one. She was the only white woman in prison, and this fact made her presence there a source of obvious embarrassment. She had three young children, one about four years old, with her in prison. One of the subordinate officers, who has a farm near Quincy, Illinois, and has some means, had sufficient confidence in her reformation to incline him to marry her and take her East, provided she was pardoned; and it was thought best under the circumstances, to pardon her on condition of her leaving the State, not to return.

## HENRY T. HELMBOLD'S
